

The Graduate School in Particle Physics and Astroparticles of Annecy-le-Vieux was held from 22 to 26 July 2013. The School is attended by students in physics from universities around the world in their 3rd or 4th year. Lecturers are members of LAPP and LAPTh. The 4-day lectures cover LHC Physics, Neutrinos, Heavy Flavours, dark matter and cosmic rays and gravitational waves. Apart from the lectures hands-on sessions are organised around the usage of computation tools. With the lectures being held in a research laboratory, the students benefit from discussions with all members of LAPP and LAPTh.
