

LAPTh is a member of HiggsTools, an Initial Training Network (ITN) supported by the 7th Framework Programme of the European Commission.

HiggsTools consists of 10 teams from 37 European Universities and Research Institutes, one International Organisation (CERN), and 4 partners from the private sector.

LAPTh is the coordinator of the French participation. The programme covers the important physics of the Higgs and the concomitant topic of the nature of the electroweak symmetry breaking and what may lie beyond it. More info [here](#).
