

Bringing together about 80 participants, the 6th edition of the international conference RAQIS (Recent Advances in Quantum Integrable Systems) was held from 1 to 5 September 2014 in Dijon (France).

Co-organised by LAPTh and the University of Burgundy, it has become a major event for specialists in quantum integrable systems. Last meeting of the ANR programme 'DIADEMS', the conference was to hear about forty presentations covering the latest developments in the field from mathematical aspects to applications in string theory, statistical physics and condensed matter physics.
