

Agenda

The list of all LAPTh seminars, past and upcoming, including some common seminars with the experimental laboratory LAPP and those within the Fédération MSIF, more mathematically minded, are listed on [Indico](#) from which you can have access to a copy of the presentations. Seminars are usually on Thursday at 11am, coffee & cookies is served 15mn earlier.

We also organise non specialised, general physics, seminars. These are usually on Friday at 2pm.

Specialised lectures and series of courses are also organised, see the [agenda for lectures](#)

Speakers

Speakers should get in touch with the seminars organisers, Björn HERRMANN and Laurent GALLOT and send a [message to this address](#) . Please provide a title and short abstract. Once your seminar has been given, you should email a pdf copy of your talk to [Björn HERRMANN](#)

For our regular seminars, please consider that the audience represents the whole spectrum of LAPTh activities. Therefore an effort is to be made for at least the first 20 minutes so that most can benefit.
