

The Agate-Tempo tool, also available in English (at least for some information), is dedicated to the deposit of your leave and telework days.

It is reachable at the following address: <https://agate-tempo.cnrs.fr/>

All possible actions (apply for, view or cancel an absence for instance) are proposed from the home screen.

This application is compulsory for CNRS agents. Concerning the “télétravail”, only those who have an official decision from CNRS can submit telework days. Would you be interested in applying for the telework, the request must then be submitted in Ariane but only if you have been holding your position for more than 6 months. Concerning your leave requests, in order to validate the request, I need an email from your supervisor giving his agreement.

Please do not hesitate to contact me if needed.

Dominique
