

In the framework of the French Excellence Initiative ENIGMASS, we are seeking candidates for a post-doctoral position at LAPTh starting in Fall 2020. The fellowship is designed for young researchers, just finishing their PhD or with no more than 2 years of postdoctoral experience at the start of the contract. The successful candidate will join the LAPTh astroparticle and cosmology group and is expected to work on theoretical/phenomenological strategies and analyses to test the dark matter paradigm as well as specific models via gravitational interactions.
