

We invite applications for two postdoctoral positions in string cosmology (broadly defined) in France: one at IP2I (CNRS, UCBL), Lyon, with Dimitrios Tsimpis, and one at LAPTh (CNRS, USMB), Annecy, with David Andriot.

The positions are funded thanks to the ANR Grant DarES.

All information can be found following [this link](#)

The application **deadline on Dec 14, 2025**

*Dark energy equation of state in terms of redshift. A string-inspired quintessence model, with coupling to (dark) matter, gives the green curve, which provides a good fit of the DESI observational data in orange. Taken from arXiv:2505.10410.
